

7. HAEMATOLOGICAL CANCERS	CODE
• Constellation of 3 or more of the following symptoms: fatigue, night sweats, weight loss, itching, breathlessness, bruising, recurrent infections, bone pain, fever, bleeding, alcohol-induced pain, abdominal pain, lymphadenopathy, splenomegaly. • Persistent unexplained splenomegaly.	7A 7B
REFER IMMEDIATELY	
• Patients with a blood count/film reported as acute leukaemia. • Patients with spinal cord compression or renal failure suspected of being caused by myeloma	

8. SKIN CANCERS											
NB – EXCISION IN PRIMARY CARE SHOULD BE AVOIDED											
Melanoma											
• With a lesion suspicious of melanoma, that is changing and/or scoring 3 points or more from the features below (based on major features scoring two points each and minor features scoring one point each):- <table> <tr> <th>Major features</th><th>Minor features</th></tr> <tr> <td>Change in size</td><td>Largest diameter >=7mm</td></tr> <tr> <td>Irregular shape</td><td>Inflammation</td></tr> <tr> <td>Irregular colour</td><td>Oozing</td></tr> <tr> <td></td><td>Change in sensation</td></tr> </table> • With unexpected histological diagnosis of Melanoma.	Major features	Minor features	Change in size	Largest diameter >=7mm	Irregular shape	Inflammation	Irregular colour	Oozing		Change in sensation	8Ai 8Aii
Major features	Minor features										
Change in size	Largest diameter >=7mm										
Irregular shape	Inflammation										
Irregular colour	Oozing										
	Change in sensation										
SCC											
• Non-healing keratinising or crusted tumours >1cm with significant induration on palpation and documented expansion over 8 weeks. • With unexpected histological diagnosis of squamous cell carcinoma. • Who have had an organ transplant with new/growing cutaneous lesions.	8Bi 8Bii 8C										

Visit www.sunsmart.org.uk for pictorial guidance.

9. HEAD AND NECK CANCERS	CODE
Urgent Referral	
• An unexplained persistent sore or painful throat. • Unilateral unexplained pain in the head and neck area > 4 weeks associated with otalgia but normal otoscopy. • Unexplained ulceration of oral mucosa or mass persisting > 3 weeks. • All red or red and white patches of the oral mucosa that are painful and swollen/bleeding. • Unexplained neck lump of recent onset or previous undiagnosed lump changing over 3 – 6 weeks. • Unexplained persistent swelling in parotid or submandibular gland. • Thyroid swelling associated with: - A solitary nodule increasing in size. - A history of neck irradiation. - Family history of endocrine tumour. - Unexplained hoarseness or voice changes. - Cervical lymphadenopathy. - Pre-pubertal patient. - Patient aged >=65 years.	Refer to ENT 9A ENT/OMF 9B OMF 9C OMF 9D ENT/OMF 9E ENT/OMF 9F 9G
REFER IMMEDIATELY	
• Patients with symptoms of tracheal compression including stridor due to thyroid swelling.	

10. BRAIN TUMOURS	CODE
• Progressive neurological deficit developing over days to weeks (e/g/ weakness, sensory loss, dysphasia, ataxia). • New or recent onset seizures. • Headaches or mental changes. • Cranial nerve palsy, unilateral sensorineural deafness. • Headaches of recent onset accompanied by features of raised intracranial pressure eg vomiting, drowsiness, post-related headache, pulse-synchronous tinnitus, blackout, change in personality or memory, a new qualitatively different/unexplained headache that becomes progressively severe.	10A 10B 10C 10D 10E
Consider urgent referral for:	
• Rapid progression of subacute focal neurological deficit, unexplained cognitive impairment, behavioural disturbance or slowness, personality changes confirmed by a witness for which there is no reasonable explanation.	10F
11. BONE CANCER AND SARCOMAS	
• A palpable lump that is: - Size > 5 cms. - Painful. - Increasing in size. - Deep to fascia, fixed or immobile. - Recurrence after previous excision. • Patients with radiological suspicion of a bone cancer.	11A 11A1 11A2 11A3 11A4 11A5 11B
REFER FOR IMMEDIATE X-RAY PATIENTS WITH SUSPECTED SPONTANEOUS FRACTURE.
