

URGENT SUSPECTED CANCER REFERRAL
ROYAL STOKE UNIVERSITY HOSPITAL

NON SITE SPECIFIC (NSS)

Rapid assessment of patients with symptoms and clinical signs that could represent cancer or serious disease, but do not already have a designated pathway or tumour site specific pathway for urgent investigations or referral. Use Cancer Maps to support decision making if unsure. Symptoms should be of new onset (within 12 months).

Patients who receive a significant disease diagnosis including non-cancer will be internally referred within secondary care to the most appropriate service. All other patients will be referred / discharged back to primary care with advice. (Please note no new referrals will be accepted within a year of discharge from the NSS Pathway).

Patient				Referrer	
Title	Title	Surname	Surname	GP Name (registered GP)	Registered GP Full Name
First Name	Given Name			GP Name (referring GP)	Free Text Prompt
Address	Home Full Address (single line)			GP Telephone Number	Organisation Telephone Number

(Additional information required)	
History of Presenting Symptoms			
(Additional information required)			

Primary Care pre-referral actions

1. Please confirm the patient is aware of the possible diagnosis of cancer. Explain the urgency and importance of attendance to appointment due to the suspicion of cancer. ☐
2. Please confirm the patient information leaflet has been given. ☐
3. Please confirm the patient is available & willing to attend an appointment within the next 7 calendar days if required. ☐

Please confirm that you have completed ALL the following filter function tests including FIT, which can be found on Order Comms/ICE by clicking on the Non Site Specific 2WW Tab and refer once results are back. **Failure to do so WILL result in your referral being rejected and/or delay in your patient's investigations.**

LFTS ☐

FBC ☐

CRP ☐

ESR ☐
