Local Secondary Care Provider (please tick the secondary care provider for onward referral after images are taken).	RWT			Walsall (WHT)			☒
☐ Patient has been informed that this is an urgent referral for suspected cancer, and they may wish to take a family member or significant other to the initial appointment. ☐ The patient is available and willing to attend hospital for tests/appointment within 14 days. ☐ The patient has been given the Urgent Referral Patient Information Leaflet							

Clinical Photographs are to be taken by Health Harmonie in face to face (F2F) appointments that they will arrange following receipt of the advice request from General Practice.

If you understand that the patient is unable to attend a F2F appointment to have their photograph(s) taken or the patient cannot or has not given consent for the photograph(s) to be taken, please tick the box below and provide the reason(s) why the patient is unable to attend a F2F appointment.

☐ Patient will be unable to attend Face to Face appointment to have clinical photograph(s) taken.

Please use the space below to describe the issues / restrictions for the patient preventing them from attending a F2F appointment: including skin lesions in intimate body areas.

Patients with lesions in the genital area will not be offered photographs.

For lesions in other intimate areas the referrer should discuss with patients whether they would be happy to have photographs taken.

Clinical Photography: Referral must have an accompanying photograph unless exceptions apply. Photographs must include scene-setting and several close ups taken from different angles. In-focus photographs showing straight on, and elevation views are most useful.

REASON FOR REFERRAL (please indicate as appropriate)

SUSPECTED MELANOMA

☐ Suspicious pigmented skin lesion with a weighted 7 point checklist score of 3 or more:

Major Criteria (2 points)

- ☐ Change in size
- ☐ Irregular shape
- ☐ Irregular colour

Minor Criteria (1 point)

- ☐ Lesion over 7mm diameter
- ☐ Inflammation
- ☐ Oozing or crusting

- ☐ Dermoscopy suggests melanoma of the skin (7 point checklist not required)
- ☐ Pigmented or non-pigmented skin lesion that suggests nodular melanoma (7 point checklist not required)
- ☐ Change in sensation

SUSPECTED SQUAMOUS CELL CARCINOMA

- ☐ Skin lesion that raises the suspicion of squamous cell carcinoma
- ☐ Scaling / Crusting / Non healing lesion
- ☐ Growing
- ☐ Induration
- ☐ Bleeding

SITE OF LESION (if multiple lesions, list all)

SIZE OF LESION -If the patient has more than 1 lesion, please state size, appearance, duration, and growth of each subsequent lesion:

Does the patient have capacity to consent: Yes ☐ No ☐

Relevant Clinical Additional Information:

Allergies: **see below**

Anticoagulants / Blood Thinners: Yes ☐ No ☐

Immunosuppression: Yes ☐ No ☐

Pacemaker (or other electronic implanted device): Yes ☐ No ☐

Pregnancy: Yes ☐ No ☐

WHO Performance Status:

- ☐ 0 Fully active
- ☐ 1 Able to carry out light work
- ☐ 2 Up and about greater than 50% of waking time
- ☐ 3 Confined to bed/chair for greater than 50%
- ☐ 4 Confined to bed/chair 100%
