

West Midlands Familial Hypercholesterolaemia Service (WMFHS) Referral Form

Patient's Surname: Surname		Previous Surname (If known): Previous Surname	
Forenames: Given Name			
D.O.B: Date of Birth	Age: Age	NHS No: NHS Number	
Address: Home Full Address (single line)		Postcode: Home Address Postcode	
Telephone No. Daytime: Patient Home Telephone		Mobile: Patient Mobile Telephone	
Ethnicity: Ethnic Origin			
Special Requirements (e.g. hearing loss, physical disability):			
Spoken Language: Main Language			
Interpreter Required (e.g. BSL, Language): Yes ☐ No ☐			
Has patient consented to referral: Yes ☐ No ☐			

Referral Date: Short date letter merged	Referring GP/Consultant: Free Text Prompt	CCG/Trust:
GP Practice: Organisation Name		
Address: Organisation Full Address (single line)		Post Code: Organisation Postcode
Tel No: Organisation Telephone Number		Email: Organisation E-mail Address

PLEASE NOTE:-

FH is characterised by lifelong elevation of LDL-C levels, therefore FH is not usually indicated in patients whose lipids have previously been in a 'normal range'. (Cholesterol levels can rise considerably in post-menopausal women)

Patients with Triglycerides >4.5 mmol/L are not eligible for referral.

Secondary causes of hypercholesterolaemia should be excluded prior to referral to include:

- Chronic Liver Disease
- Nephrotic Syndrome
- Hypothyroidism
- Diabetes Mellitus (poorly controlled)

LIPID RESULTS TO ACCOMPANY THE REFERRAL

Please note we require the highest recorded total cholesterol (TC), together with concurrent lipid results as detailed below. If a full set of lipids is not available at the time of the highest TC you must provide results from a repeat full lipid screen. It is important that any treatment for lipid reduction taken at the time of the result is documented. A summary record of the patients' lipid results can be submitted to aid this referral.

	Date	TC	Trigs	HDL	LDL	If on lipid lowering medication, state drug and dose
Earliest ever lipid levels						
Highest ever lipid levels						
Most recent lipid levels						

Does the patient have 1st Degree relatives with proven documented CHD <60 years?	Yes ☐	No ☐
List patient's current lipid lowering medication and date of commencement:		
Relevant medical history (Please report any clinical history of premature CHD/CVD < 60 years):		
If this patient is found to be appropriate for referral to a Lipid Consultant this will be done DIRECTLY by the FH Specialist Nurse. If you DO NOT wish for us to refer directly please tick here ☐		

Incomplete forms will be returned

GP's - please email completed forms via eRS (formerly Choose and Book)

Speciality – Endocrinology and Metabolic Medicine

Clinic Type – Lipid Disorders

Service Name - Genetic Screening for Familial Hypercholesterolaemia - Primary Care Based Service - RRK

Referral Assessment Service (RAS)

Send for Triage and attach referral form

Relevant medical history:
