

General Family History Form

West Midlands Clinical Genetics Service

Please send completed forms to:

**CLICS, Clinical Genetics Unit, Lavender House, Birmingham Women's Hospital, Edgbaston,
Birmingham B15 2TG or email**

If you would like advice on completing this form please contact Clinical Information Collection Service (CLICS) on 0121 335 8024 or at genetics.info@nhs.net

For **cancer related** referrals please use the cancer family history form at <https://bwc.nhs.uk/information-for-professionals-genetics>

① Important: please read the following information before completing this form

Why have I been given a family history form?

You have been given a Family History Form in order to obtain more information about your family so that we can draw an accurate family tree. It is useful to know about medical conditions that have occurred in your family as these may be relevant. The information will be used to give accurate advice to you and your family. The information you give us may be shared with other health professionals involved with your care. This information will not be disclosed to anyone else without your consent.

How much information do I need to give?

Please try to give as much information as possible. If you are unable to complete all sections, please just return the form giving as much information as you can, including approximate dates. We ask when and where people were treated as this can help us confirm key details. Please still include detail for family members who have not had any problems as this can still provide helpful information. We won't contact any of your relatives without your permission but we may need this information to provide accurate recommendations.

What if I'm adopted or not in contact with my family?

We appreciate that not everyone can access information about their family history. If you cannot trace certain family information, please note this on the form and return it to us. We will still be happy to see you and will work with you to try and gather any essential information. We will not contact your relatives without your permission.

Why have I been asked about relatives and family structure?

It is important that we know about biological relatives and how you are linked to each other to make an accurate assessment. We also appreciate that families come in all shapes and sizes and are not defined just by biology. Please let us know if there is any additional information such as donor conception (egg/sperm/embryo donation), adoption, or half-siblings and stepfamily. If you do not know some of your family history, please note this.

Why are you asking me about gender and sex assigned at birth?

For many individuals, their gender will be the same as their sex assigned at birth. We will always respect your identity and appreciate that gender is about much more than our anatomy. It is helpful to know this information, as some genetic conditions have different effects depending on a variety of typical sex-related differences, such as hormones or chromosomes. All the information will be held in strict confidence and you are welcome to call and speak to a member of our team if there is anything you would like to discuss.

What happens when you receive my form?

Please return this form in the prepaid envelope provided within the next 4 weeks. As soon as we receive the form we can start gathering the information we need. Gathering the relevant information can take some time, sometimes up to two months so there may be a delay before your appointment.

Section A: Referrer's Details (to be completed by the referring clinician)

Referred by: Free Text Prompt	Contact telephone number: Organisation Telephone Number
Position: Free Text Prompt	Contact email address: Organisation E-mail Address
Address (or clinic stamp): Organisation House Name/Flat Number Organisation Number and Street Organisation Village Organisation Town Organisation County	Date of Referral: Short date letter merged
Postcode: Organisation Postcode	Referral Reason:

Section B: Patient Details
