Past Medical History (Can attach document to referral)			
see below			
Provided all symptoms have resolved > start aspirin 300mg OD and give first dose (If genuine aspirin allergy start clopidogrel 75mg OD). If either of the following apply: - On-going symptoms - On Anticoagulation i.e. Warfarin/ Heparin/ DOAC *Patient needs urgent assessment – please send to New Cross ED			

Patient Advice:

Have you told the Patient?

- Reason for referral and to be available for appointment within 24 hours ☐
- They must not drive until further notice ☐
- FAST Information ☐
- If the patient experiences any further event, they should phone 999 or go immediately to ED ☐
- Any witness to the event, should accompany the patient to hospital or clinic, if possible ☐
- To take medication list to clinic ☐
-

If a patient has had any of the following symptoms, TIA is unlikely, if present alternative referral should be considered:

Gradual onset or spread of symptoms /Headaches, seizure or loss of consciousness / Transient Amnesia / Isolated double vision / isolated visual blurring /Isolated vertigo with no other cranial nerve features / Isolated positive sensory symptoms (pins & needles)
