

Standard Operating Procedure (SOP)

Langton Medical Group Spirometry Appointment Booking and Follow-Up Procedure

Purpose:

To ensure a streamlined and standardised process for using Spirometry service provided by the Langton Medical Group for practices in the Lichfield and Burntwood PCN.

1. Referring Patient for Spirometry

- The clinician completes the “DAR-PRF1036 SSOT Spirometry Service Referral Form” provided by Staffs and Stoke ICB and saves it in the patient’s record.
- The clinician should document the patient’s current height, weight and observations in their record.
- The clinician requests the allocated practice staff member to book an appointment for Spirometry.

2. Responsibilities of Staff Member Booking the Appointment

- The staff member should access the patient’s record then select ‘**Find cross-organisational slot**’ from the drop-down menu on the appointment screen.
- Change the **organisation** to “Lichfield and Burntwood PCN Network”.
- Change the **slot type** to “Spirometry LANGTON”.
- Choose the appropriate appointment time and then select book appointment. When booking the appointment you should ensure the patient’s phone numbers are added to the appointment reason.
- The patient should be informed they will receive a text message confirming the appointment. The message will also include an information sheet regarding Spirometry and the process at Langton. Patients who are unable to receive text messages will instead receive a phone call.

3. Exclusion Criteria

- All staff should be aware of the following exclusion criteria. If the patient does not meet these criteria, the appointment will be cancelled and the patient referred back to the practice.
 - **Under 6 years old**
 - **Antibiotics or steroids prescribed in the last 6 weeks**

4. After the Appointment

- The referring clinician will receive a 'patient note' containing the Spirometry results and the nurse's interpretation of the results.
 - It is the clinician's responsibility to code any diagnosis resulting from the Spirometry and take appropriate action.
-

5. Notes

- All appointments will be based at Langton Grange Medical Centre, Eastern Avenue, Lichfield, Staffordshire, WS13 7FA.
 - The nurse conducting spirometry is ARTP accredited and will use the template 'DQT ICB Spirometry Service Delivery_V1.0' provided by the ICB to record the information. A copy of the spirometry report from the machine will also be saved onto the patient's record.
 - Please ensure all steps are followed carefully to maintain consistency and accuracy in the Spirometry referral and follow-up process.
-
